

REMARKS

The new claims 4 and 5 presented herewith put heavy emphasis on two unique aspects of the invention, namely the ladder-style frame that has minimal elements and the multiplicity of hull roller assemblies on that ladder-style frame or disassembled and ready for assembly upon that ladder-style frame. The combination of a ladder-style frame and the special hull roller assembly as recited provides users with extraordinary simplicity and highly effective boat ramps.

Early examination and favorable action are courteously requested.

Respectfully submitted,

Date: 23 Nov 04
